

Squall

Sticker & anti-drift adjuvant
improving the performance of crop protection

Superior deposition

Anti-drift

Rainfast

Biodegradable

Content: 10 litres

Squall

Squall® improves the spray deposition and reduces drift. Add 0.5% Squall to your tank and the mix will stick to the crop and improve the rainfastness. Squall is 100% biodegradable.

Product information

- Squall can be mixed in combination with water and herbicides, fungicides, insecticides as well as fertilizers.
- Not compatible with **MaisTer OD®** or **Atlantis OD®**

Directions for use

- **Dosage:** Use 0.5 litre Squall per 100 litres of spray liquid (**0.5% or 500 ml per 100 litres**).
- Squall should be added slowly to the tank mix as the **last ingredient** after all other ingredients have been dissolved, stirring continuously.
- Can be sprayed with standard and drift reducing nozzles.
- Squall is a viscous liquid: pour the liquid carefully.

Storage and Safety precautions

- Squall is **100% biodegradable** and environmentally friendly.

- Store Squall with the other crop protection products in a dedicated, cool storage at a minimum temperature of +2 ° Celsius.
- Avoid prolonged exposure to sunlight and close the cap after usage.
- Follow strictly the guidelines for personal protection when using crop protection products.

Danger

- Contents: CAPRYLOYL/
CAPROYL METHYL GLUCAMIDE
- Causes serious eye damage.
- Keep out of reach of children.
- Wear eye protection.
- **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a doctor, a POISON CENTER.
