HERBICIDE

Contains: 200g/litre mecoprop-P, 200g/litre MCPA and 70g/litre fluroxypyr in the form of an emulsifiable concentrate

For broadleaf weed control in wheat, barley and oats

CORROSIVE, ECOTOXIC
KEEP OUT OF REACH OF CHILDREN
PLEASE READ THE ENTIRE LABEL BEFORE USE. SHAKE OR STIR WELL BEFORE USE.

HAZARD CLASSIFICATION: 6.1D, 6.9A, 8.2B, 8.3A, 9.1A, 9.2A, 9.3B

APPROVED HANDLER: This product must be under the control of an approved handler during use. See SDS for details.

This product must not be used for any purpose or in any manner, contrary to this label, unless authorised under appropriate legislation.

RECORD KEEPING: Records of use as described in NZS 8409 Management of Agrichemicals must be kept whenever Saxon is used.

DANGER: This product is corrosive to eyes and skin.

WARNING: May be harmful if swallowed, inhaled or absorbed through the skin. Can cause skin and eye irritation. May cause target organ damage from repeated oral exposure at high doses.

FIRST AID: If swallowed do NOT induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. If splashed in eyes, wash out immediately with water.

PERSONAL PROTECTION: Avoid skin and eye contact and inhalation of spray mist.

When mixing or applying wear waterproof gloves, eye protection, boots and overalls. Do not eat, drink or smoke while using. Wash splashes of concentrate from skin immediately. Remove protective clothing and wash hands and face thoroughly before meals and after work. Wash protective clothing daily after work.

ECOTOXIC: Very toxic to aquatic organisms with long-lasting effects. Avoid contamination of any water supply with product or empty container. Very toxic to the soil environment. Selective herbicide very toxic to some plant species. Toxic to terrestrial vertebrates.

STORAGE: Store in original container, tightly closed and in a dry, cool area away from foodstuffs. Store in accordance with NZS 8409 Management of Agrichemicals.

DISPOSAL: Triple rinse empty container placing rinse water in the spray tank. If recycling, discard cap and deliver clean container to an Agrecovery depot or crush and bury in an approved landfill. Dispose of product only by using according to this label, or at an approved landfill or disposal facility.

SPILLAGE: Wear appropriate protective clothing. Exclude all bystanders from the vicinity of the spill, and prevent material from entering waterways. Contain liquid spills and absorb with inert material and place in waste containers. Wash area with water and absorb with further inert material. Dispose of waste safely in an approved landfill.

SAFETY DATA SHEET: Additional information is listed in the Safety Data Sheet available from Lonza NZ Limited or www.lonza.co.nz

Approved pursuant to the HSNO Act 1996, No: HSR100501. See www.epa.govt.nz for approval conditions.

Registered pursuant to the ACVM Act 1997, No: P008401. See www.foodsafety.co.nz for registration conditions.

DIRECTIONS FOR USE in CEREALS (wheat, barley, oats):

Saxon will control or suppress indicated broadleaf weeds. Apply to seedling weeds in active growth.

Susceptible weeds include: black nightshade, chickweed, cleavers, combind, docks, fathen, grousdel, hedge mustard, nettle, redroot, shepherds purse, thistles, volunteer brassicas, wild turnip, wireweed.

Moderately susceptible weeds include: calindrinia, clover, fumitory, hawksbeard, mouse-ear chickweed, sow thistle, twin cress, vetch, willow weed. Apply 2.0 to 3.0 litres Saxon per hectare.

Use the higher rate for larger weeds and those listed as moderately susceptible.

The addition of Quantum® (500g/litre diflufenican) at 200ml/ha will broaden the weed control to include the following weeds: speedwells, stagger weed, field pansy.

The addition of dicamba or clopyralid will broaden the spectrum to control other weeds such as mayweeds and yarrow.

APPLICATION TIMING:

To maximise crop safety apply Saxon between GS12 (two leaf stage) and GS31 (first node detectible).

MIXING: Pour the correct amount of Saxon into the partly filled tank, and while agitating add the remainder of the water. Maintain agitation during spraying and any stoppages.

ADJUVANTS: Additional surfactant is not normally required when using Saxon.

COMPATIBILITY: Saxon is compatible with likely insecticide, fungicide and herbicide tank mix partners. Ensure one is thoroughly mixed before adding the next.

APPLICATION: Apply Saxon via conventional ground rig equipment using 100 to 250 litres water per hectare as a medium quality spray. For dense weed infestations use the higher water rate. Do not allow spray drift onto susceptible crops or land to be planted with susceptible crops. Do not apply Saxon onto or into water.

CROP ROTATIONS: Saxon does not have any following crop rotation restrictions. However after a crop failure only plant cereal or grass crops.

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.

GRAZING WITHHOLDING PERIOD FOR GRAZED OR FAILED CROPS: 7 days.

SPRAY EQUIPMENT CLEANING

To avoid injury to subsequently sprayed sensitive crops thoroughly remove all traces of Saxon from mixing and spray equipment. After using Saxon empty the spray unit and completely drain the whole system. Thoroughly clean all sprayer parts including tank, pump, hoses, filters and nozzles with several flushes of clean water.

NOTICE TO BUYER: The manufacturer and vendors of Saxon warrant the formulation to contain the specified active ingredient within accepted tolerance but make no warranty of any kind on the uses of material and accept no responsibility, whether the material is used in accordance with the label directions or not.
