

WARNING

KEEP OUT OF REACH OF CHILDREN

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

TAG®
2nd Generation

HERBICIDE

Contains: 350g/litre terbuthylazine, 60g/litre amitrole, 15g/litre oxyfluorfen and 100g/litre glyphosate in the form of a suspension concentrate

Fast acting Knockdown & Residual Herbicide

**Total vegetation control for non-croplands
and selected orchard crops**

PLEASE READ ENTIRE LABEL BEFORE MIXING OR APPLYING. SHAKE OR STIR WELL BEFORE USE

HSNO CLASSIFICATION: 6.1E, 6.4A, 6.8B, 6.9B, 9.1A, 9.2A, 9.3C

QUALIFICATION REQUIREMENTS: Persons mixing, loading, applying, or otherwise handling TAG G2 must meet qualification requirements set out in the EPA Hazardous Substances (Hazardous Property Controls) Notice 2017.

RECORD KEEPING: Records of use as described in NZS 8409 Management of Agrichemicals must be kept whenever TAG G2 is used.

TOXIC: May be harmful if swallowed. May be harmful in contact with skin. May be harmful if inhaled. Causes serious eye irritation. Suspected of damaging fertility or the unborn child. May cause damage to organs. May cause damage to organs through prolonged or repeated exposure.

FIRST AID: IF exposed or concerned: Call a POISON CENTER/doctor/physician/first aider. For advice contact the National Poisons Centre 0800 POISON (0800 764 766). IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. IF INHALED: Call a POISON CENTER/doctor/physician/first aider. Remove person to fresh air and keep comfortable for breathing. Take off contaminated clothing and wash it before reuse.

PERSONAL PROTECTION: Do not breathe mist/vapours/spray. Wear protective gloves/protective clothing/eye protection/face protection. Do not eat, drink or smoke while using this product.

ECOTOXIC: Very toxic to aquatic life with long lasting effects. Avoid contamination of any water supply with product or empty container. Very toxic to the soil environment. Harmful to terrestrial vertebrates.

STORAGE: Store locked up. Store in original container, tightly closed and in a dry, cool area away from foodstuffs. Store in accordance with NZS 8409 Management of Agrichemicals.

DISPOSAL: Triple rinse empty container placing rinse water in the spray tank. If recycling, discard cap and deliver clean container to an Agrecovery depot or crush and bury in an approved landfill. Dispose of product only by using according to this label, or at an approved landfill or disposal facility.

SPILLAGE: Wear appropriate protective clothing. Exclude all bystanders from the vicinity of the spill, and prevent material from entering waterways. Contain liquid spills and absorb with inert material and place in waste containers. Wash area with water and absorb with further inert material. Dispose of waste safely in an approved landfill.

SAFETY DATA SHEET: Additional information is listed in the Safety Data Sheet available from Lonza NZ Limited or www.lonza.co.nz

HSNO ADDITIONAL CONTROLS: The following maximum application rates of this substance are set:

- 25 L/ha (1.5 kg amitrole, 2.5 kg glyphosate, 0.375 kg oxyfluorfen and 8.75 kg terbuthylazine /ha) with a maximum frequency of twice a year in non-crop land; and
- 6 L/ha (0.36 kg amitrole, 0.6 kg glyphosate, 0.09 kg oxyfluorfen and 2.1 kg terbuthylazine /ha), with a maximum frequency of application of 6 times per year in orchards.

DIRECTIONS FOR USE

BWARE: Apply this product carefully. Spray drift may cause serious damage to other desirable plants.

TAG G2 will control nearly all annual and perennial grasses in non-cropland areas.

TAG G2 will give up to 12 months residual activity on a wide range of species.

USE	RATES			CRITICAL COMMENTS
	Boom	Handgun	Knapsack	
Non Cropland Perennial weeds or long term residual control (6-12 months) - Fence lines - Tracks/driveways - Yards	20-25 litres/ha	2 litres/100 litres	25 mL/litre	Mix in sufficient water to obtain even coverage. Apply in spring or autumn when all weeds are growing actively, and while soil is moist. Do not apply under drought conditions. In dusty conditions add a non-ionic surfactant such as Multi-Film Extra®. Maximum application of twice per year.
Orchard Crops Annual weeds or short term residual control (1-3 months) - Citrus - Grapes - Kiwifruit - Pipfruit	6 litres/ha	600 mL/100 litres	6 mL/litre	Do not use around any trees or vines less than 3 years old. Do not allow the spray mixture to contact any crop foliage, fruit or green bark. Apply in spring or autumn as a directed spray to the base of the tree or vine. Apply when kiwifruit, grapevines and berryfruit are dormant. Maximum application of 6 times per year.

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.

WARNING: Care must be taken around non-absorbent surfaces such as cobblestones, driveways and concrete paths so that runoff does not reach the roots of desirable plants.

APPLICATION: Ensure complete coverage of weeds and bare ground for residual control. Maintain agitation throughout spraying.

Knapsack: Each litre of spray mix should treat 10m².

Handgun: 100 litres of spray mix should treat 1,000m².

Boom: Use a suitable water rate to achieve complete coverage of weeds.

Sprayer Clean-up: To avoid injury to subsequently sprayed sensitive crops, thoroughly remove all traces of TAG G2 from mixing and spray equipment. Thoroughly clean all sprayer parts with several flushes of clean water. Dispose of all washings safely

COMPATIBILITY: May be tank mixed with most other herbicides.

RESISTANCE MANAGEMENT: **GROUP C1+F3+E+G HERBICIDE** TAG G2 contains a triazine herbicide that inhibits photosynthesis at photosystem II plus a triazole herbicide that inhibits carotenoid biosynthesis plus a diphenyl ether herbicide that inhibits protoporphyrinogen oxidase plus a glycine herbicide that inhibits EPSP synthase. Despite this four way mixture making TAG G2 a robust resistance management tool, naturally occurring resistant biotypes could develop. To minimise this risk use strictly in accordance with label instructions and use other mode of action herbicides periodically. For further information see www.resistance.nzpps.org

NOTICE TO BUYER: The manufacturer and vendors of TAG G2 warrant the formulation to contain the specified active ingredient within accepted tolerance but make no warranty of any kind on the uses of material and accept no responsibility, whether the material is used in accordance with the label directions or not.
